SOFTWARE QUALITY ASSURANCE ENGINEER

Manual & Automation Testing | Performance Testing | Agile Methodologies

Experienced SQA professional with 4+ years in the software industry, specializing in manual, automated, and performance testing across web, API, and mobile platforms. Proficient in test planning, business requirements analysis, and executing test cases (TCs) using tools like Selenium, Appium, and JMeter. Proven track record of enhancing system stability, managing bug reports, and optimizing testing processes within Agile and SDLC frameworks.

WORK EXPERIENCE

BreakThru – Pakistan

07/2018 - 09/2022

Software Quality Assurance Engineer

Responsible for managing the full testing lifecycle, reducing critical bugs, and ensuring software quality.

- Reduced testing time by 40% by automating 70+ regression test cases using Selenium and Appium, resulting in accelerated release cycles through CI/CD pipeline integration.
- Increased test coverage by 25% by developing and managing 100+ test cases using Cucumber BDD and Testrail, leading to faster issue detection.
- Boosted system dashboard performance by 10% under heavy loads by creating JMeter test scripts that identified key issues, enabling targeted fixes.
- Improved system stability by 15% by managing and tracking the full bug lifecycle using Jira, resulting in a significant reduction of critical production issues.
- Ensured performance consistency across platforms by performing manual and automated testing, resulting in enhanced compatibility in web, API, and mobile applications.
- Guided product release decisions by preparing detailed test result reports, contributing to successful sprint and release testing.

Blazeo – Saudi Arabia

10/2022 - PRESENT

Product Owner

Responsible for managing product backlog, aligning development with business goals, and driving product success through cross-functional team collaboration.

- Aligned 20+ product features with business value by prioritizing and managing the backlog, enhancing stakeholder satisfaction and project efficiency.
- Ensured timely project delivery by acting as the primary liaison between stakeholders and development teams, leading to clear communication and prompt issue resolution.

EDUCATION

University of Karachi – Pakistan
Bachelor of Science in Computer Science

PROFESSIONAL SKILLS

- Proficient in manual and automation testing (Selenium, Appium) across web, API, and mobile platforms.
- Experienced in performance testing using JMeter and API testing with Postman, utilizing scripting languages like C# and Java.
- Expertise in test management and defect tracking tools (Testrail, Jira), with strong capabilities in defect lifecycle management and status reporting.
- Skilled in CI/CD integration (Jenkins) and version control systems (GitHub, Git), ensuring seamless deployment and versioning.
- Strong understanding of Agile methodologies and SDLC processes, with hands-on experience in business requirements analysis and quality control life cycle.
- Proven ability in risk management, strategic planning, and enhancing product quality to meet organizational objectives.

CERTIFICATIONS & COURSES

- | | |
|--------------------------------------------------------------------------|---------|
| • Test Automation Professional Certificate (LambdaTest) | 08/2024 |
| • Software Testing Professional Certificate (LambdaTest) | 08/2024 |
| • Scrum Foundation Professional Certificate (CertiProf) | 08/2024 |
| • Agile Project Management Professional Certificate (Atlassian) | 09/2024 |

PROJECTS

Blazeo – Web Application

- Automated web application test cases using Selenium (C#).
- Integrated with BrowserStack to execute automated tests on various browser configurations, improving test accuracy and coverage.

ApexConnect – Mobile Application

- Automated mobile test cases using Appium, enhancing test coverage and ensuring compatibility across different mobile devices.
- Integrated with BrowserStack to run automated test cases on the cloud, ensuring comprehensive cross-device and cross-browser testing.

LANGUAGE COMPETENCIES

- Urdu: Native
- English: Professional (speaking, reading, writing)
- Arabic: Basic (speaking)
